DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 54, 57, 61, 62, 63, 64 and 65 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,639,277 to Mariant et al.

Mariant discloses an occlusive device comprising a vasoocclusive coil having a primary coil configuration with two-dimensional J-shaped loops (FIG. 1, FIG. 3, FIG. 5) at the proximal and distal ends of the coil, said vasoocclusive coil including a radiopaque strand (Column 4 lines 3-6).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 59 and 60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mariant et al. '277 in view of U.S. Patent No. 5,733,329 to Wallace et al.

Mariant discloses the claimed invention except for the diameter of the helical loops. Wallace teaches that a 2 mm device may be used in vasoocclusive applications depending on the particular site within the human body (Column 5 lines 5-15). It would have been obvious to

one having ordinary skill in the art at the time the invention was made to provide the device of Mariant with the diameter of Wallace in order to place the device of Mariant in an appropriately sized vessel.

Response to Arguments

5. Applicant's arguments with respect to claim 54 has been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
